

SOP 12 for Vaccinating against specific disease of concern

*SOP must contain enough information to ensure that any staff responsible for vaccinating animals are able to do so. Items in **bold** are mandatory/required items. Items not in bold (below the chart) are extra items that can be checked off as applicable to your farm.*

- Check here if NO vaccines are administered on this farm
- **Consulted with herd veterinarian _____ (vet name) to establish a vaccination program based on the herd’s Animal Health management plan**
- **Record all vaccination treatments that have a milk and/or meat withdrawal on the treatment record**
- **The following age of animals receive the listed product for vaccination:**

PRODUCT	Vaccine for	AGE of Animals	Booster at:

- Vaccinate new animals prior to them entering the herd or as soon as possible.
- Isolate new animal additions until vaccines can be administered by placing them in the following location:
