

Templates for the Biosecurity standard operating procedures (SOPs) are included.

How these work:

- Items in **bold** are required elements. These must be included in your SOP and the practice implemented on your farm
- Other items are recommended practices. Cross off those that do not apply to your farm.
- Add any information that is missing but is practiced on your farm
- Remember that there is no such thing as too much detail
- These become a requirement for any on-farm validation after September 1, 2019. Completing them prior to your validation is strongly encouraged to prevent a corrective action being recorded.

Contact your provincial coordinator if you have any questions.

Nancy Tedford-Douglas

Atlantic proAction® Coordinator
